

**Barry Infinity Equality Field Equation and M string Theory 8<sup>th</sup> Dimension**

**By**

**Barry L. Crouse**

## Introduction

Welcome ! I will be discussing the Barry Infinity Equality Field Equation and the 8<sup>th</sup> dimension using M string theory.

This Scientific Work will be very complex in nature because according to research time lines are created at this level M string theory. There is no physical world but a conscious one. There is no parallel world so these are the parameters I have to work with. This work will basically utilize Theoretical Science.

I would like to begin by making a observation about two items and they are the following:

- 1). The 8<sup>th</sup> level states according to M string theorist that time lines are created. A further observation would be time lines are created for the Material world at the 9<sup>th</sup> level divine world or above thus I have supported the law that Energy cannot be created or destroyed it can be transferred furthermore, time lines are transferred from the 9<sup>th</sup> dimension to the 8<sup>th</sup> to allow for the Material Dimensions to be born examples Universes, galaxy's , Solar Systems time and space are irrelevant in the 8<sup>th</sup> because known physic laws do not exist
- 2). The Barry Infinity Equality Field Equation supported the fact that divinity is greater than Infinity in previous works see below :

$$\Psi > \infty$$

When I wrote the Equation, it was noted that multiple time lines and or events are created. I can take this a step further by another observation if I create Time lines for the material world 8<sup>th</sup> dimension could they not reside in different dimensions examples 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>, 5<sup>th</sup>, 6<sup>th</sup> and if time lines are created in different dimensions are they the same in different dimensions ? The answer is no they will have different property's that make each dimension unique and this supports the Barry Equality Field Equation that states Energy is Dynamic and asymmetrical.

This work will be updating the Barry Infinity Equality Field Equation using M string Theory and the 8<sup>th</sup> dimension. I will have to update this Equation on the 6<sup>th</sup>, 7<sup>th</sup>, and 8<sup>th</sup> level. This work will not be using the same standard format I have used in the past because of what is required in this complex discussion.

As noted in my previous work, The Barry equality Field Equation is a 7<sup>th</sup> level dimensional Equation because there is no material work in the 8<sup>th</sup> according to the M string model so I will have to develop the Barry Infinity Equality Field equation so that it can adapt to these parameters.

- 2). **Barry Infinity Equality Field Equation M string theory 6<sup>th</sup> level dimension**
- 3). **Barry Infinity Equality Field Equation M string theory 7<sup>th</sup> level dimension**
- 4). **Barry Infinity Equality Field Equation M string theory 8<sup>th</sup> level dimension**
- 5). **Final Thoughts**

## Chapter 1

**Barry Infinity Equality Field Equation M string theory 5<sup>th</sup> level dimension**

I would like begin by placing the original Barry Infinity Equality Field Equation below:

The Final Product that was written in the past regarding the **Barry Infinity Equality Field equation** showing the Expansion of Events and using Multiple Time lines is written below:

$$1). \quad \infty = ((\uparrow \mathbf{E}) \Delta(\mathbf{L} \Pi r^2 * d)) / g$$

$$2). \quad \Psi > \infty = ((\uparrow \mathbf{E}) \Delta(\mathbf{L} \Pi r^2 * d)) / g$$

This Equation would be a partial level 5 M string theory Equation because it does recognize subatomic events on the 5<sup>th</sup> level named event expansion. Subatomic particles have a partial binding in this equation so to take this to another level I must remove the g and d variable and replace it with the d variable subatomic particles speed and g for gravity. If I remove the G variable and use the subatomic variable, we can call it  $\Delta_{\text{subp}}$  and d is replaced by P for subatomic particle speed named variables below:

### **M string Theory 1-5 Partial Binding**

$$1). \quad \infty = ((\uparrow \mathbf{E}) \Delta(\mathbf{L} \Pi r^2 * d)) / g$$

$$2). \quad \Psi > \infty = ((\uparrow \mathbf{E}) \Delta(\mathbf{L} \Pi r^2 * d)) / g$$

$\Delta_{\text{subP}}$  = subatomic particles.

$\Delta P$  Subatomic particle speed

The Equation now looks like the following:

$$\infty = \Delta ((\uparrow \mathbf{E}) (\mathbf{L} \pi r^2 * \Delta P)) / \text{subP}$$

Because I can create multiple events on this time line, the 1<sup>st</sup> part of this equation allows for change of events  $\Delta ((\uparrow \mathbf{E}))$

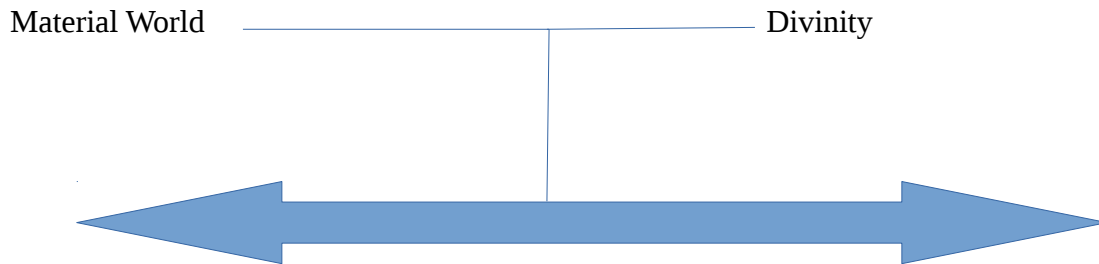

I can now multiply Linear and Pie with a change in Subatomic speed see below:

$$(\mathbf{L} \pi r^2 * \Delta P)$$

The change in  $\Delta P$  allows for variable subatomic speed when multiplied with multiple events thus dimensions can now be represented better. The G variable is now replaced by a partially binded subatomic variable **/subP**. Time lines can now be represented as multiple events and represented in different dimensions that supports the idea that Energy is Dynamic and asymmetrical

In summary, The Barry Infinity Equality Field Equation is now a complete 5<sup>th</sup> level M string theory Equation because of the allowance of subatomic particles partial binding removed. The next chapter will cover the Barry Infinity Equality Field Equation 6<sup>th</sup> level.

Partial Binding 5<sup>th</sup> level Sub atomic

**M string Theory 5**

$$\infty = \Delta ((\uparrow \mathbf{E}) (\mathbf{L} \Pi r^2 * \Delta P)) / \text{subP}$$

## **Chapter 2**

**Barry Infinity Equality Field Equation M string theory 6<sup>th</sup> level dimension**

I will now begin writing the Barry Infinity Equality Field Equation on the 6<sup>th</sup> Dimension using Quantum Mechanics.

The properties of the 6<sup>th</sup> dimension using M String Theory is that it has parallel universes has some physical world two objects can have the same property's but exist in two different places sometimes many millions, billions, zillion miles apart.

To make the Barry Infinity Equality Field Equation work at the 6<sup>th</sup> dimension, I would have to be able to create two events on one time line that are parallel and multiverse and to represent it by one variable. This can be achieved by using the following below:

$$\text{Sub E } \Delta ((\sqrt{\mathbf{E2} - \mathbf{E1}}) \mathbf{2^{nd} Power}))$$

I would like to create a example and assign the following for the following variables:

$$E2 = 2$$

$$E1 = 2$$

I will now perform the calculations

$$\text{Sub E } \Delta (\sqrt{(2 * 2 - 2)} \text{ 2}^{\text{nd}} \text{ Power))}$$

$$\text{Sub E} = ((\sqrt{4 - 2}) \text{ 2}^{\text{nd}} \text{ power))}$$

$$\text{Sub E} = ((1.414213562) \text{ 2}^{\text{nd}} \text{ power))}$$

$$\text{Sub E} = 1.999999999$$

**Barry Infinity Equality equation 6<sup>th</sup> level**

$$\infty = \frac{((\sqrt{E_2 - E_1})^{2^{\text{nd}} \text{ Power}}) \cdot ((L \cdot \pi r^2 \cdot \Delta P))}{\text{subP}}$$

Linear

Subatomic particle speed

Circular

Two Sub events =  $\uparrow$  **E** parallel Universes

sub particle mass

A quick note sub particle masses have partial binding to our Universe and they can pass through matter this is required to make this a workable solution. I will now work on the Barry Infinity Equality Field Equation 7<sup>th</sup> dimension in the next chapter.

## **Chapter 3**

**Barry Infinity Equality Field Equation M string theory 7<sup>th</sup> level dimension**

According to M string Theory guidelines, Divinity starts here with parallel and multi-Universes and physic laws being broken. The 6<sup>th</sup> Dimension Equation is below:

**Barry Infinity equality Field equation 6<sup>th</sup> Dimension**

$$\infty = \left( \left( \sqrt{E_2 - E_1} \right)^{2^{\text{nd}}} \text{Power} \right) \left( \left( L \cdot r^2 \cdot \Delta P \right) \right) / \text{subP}$$

To make this work I have to remove linear and circular motion along with sub atomic particles and use nano seconds 1 billionth of a second hint “twinkling of a eye”. I will not be able to use mass of sub particle but replace it with nano particles. Sub atomic particles represents some partial binding to our Universe thus I face some form of restriction. The 7<sup>th</sup> dimension has included breaking the laws of Physics jumping from one dimension to another in Random order. The proposed equation for the 7<sup>th</sup> dimension can be as follows below:

$$\infty = \left( \left( \sqrt{E_2 - E_1} \right)^{2^{\text{nd}}} \text{Power} \right) \left( \left( 1 \text{ nano second} \right) \right) / \text{nanoparticle}$$

After completing research it shows 1 nano particle equals  $11.05 \cdot 10^{-15}$  also 1 nano second equals 1 billionth of a second. The Equation shows the ability to jump around using nano technology to access different dimensions thus breaking the laws of physics. This is the summary of the Equation below:

### **Barry Infinity equality Field equation 7<sup>th</sup> Dimension**

$$\infty = \frac{((\sqrt{E2 - E1})^{2^{\text{nd}} \text{ Power}}))}{\text{nanoparticle}} \quad (((1 \text{ nano second})))$$

I will now go to the next chapter and use the Barry Infinity Equality Field Equation and the M string Theory 8<sup>th</sup> dimension.

## **Chapter 4**

**Barry Infinity Equality Field Equation M string theory 8<sup>th</sup> level dimension**

The 8<sup>th</sup> dimension presents some very complex issues because physical worlds do not exist similar to Digital Worlds. Time lines start here at the 8<sup>th</sup> but in reality time lines are transferred from the 9<sup>th</sup> in some form or fashion which ultimately leads up to God. The laws of Thermo Dynamics states Energy cannot be created nor destroyed but it can be transferred from Divinity to Infinity therefore the following can be supported:

Divinity > Infinity because time lines come from Divinity for allowance of transference to Infinite Dimensional systems “Energy cannot be created or destroyed” in the Infinity system. I will attempt in the future to look at the 9<sup>th</sup> dimension but many people will not understand this concept and I would admit this is a very complex way of thinking. This is best supported by the account in genesis where the Earth was void and God created time, space, matter, earth so it says Divinity creates Infinity layman’s term. The 8<sup>th</sup> dimension Equation can be written below:

$$\infty = (\uparrow \mathbf{E})$$

Time lines are created through events so I expand the events using Dimensions 1 -7 this is best represented as a examples below:

$$(\uparrow \mathbf{E}) = (n_1 * n_2 * n_3 * n_4 * n_5 * n_6 * n_7) \text{ Expansion expanding time lines}$$

N represents dimensions it is interesting to note that in the bible it took 7 days to create Earth with God resting on the 7<sup>th</sup> Day. The 7<sup>th</sup> Dimension shows less complexity as space time begins to accelerate in nano time. The 8<sup>th</sup> dimension also requires less mathematical representation because time and space have no meaning in the 8<sup>th</sup> so it would make sense not to be concerned with space time in this dimension.

I will now present my final thoughts in this work.

## **Chapter 5**

### **Final Thoughts**

This work picked up where the Barry Equality Field Equation left off. The Barry Infinity Equality Field Equation compliments the Barry Equality Field equation by extending the Equation into the Divinity world.

As I went along, I found that the Equations reached a complex peak and then became simplified because laws of Physics do not apply at higher level dimensions.

The Barry Infinity Equality Field Equation at the 5<sup>th</sup> level removed the gravity binding particle and allowed for M string theory to extend to higher dimensions.

Time lines are created in the 8<sup>th</sup> dimension because it has no physical world but from the divine world 9<sup>th</sup> and above would have to allow the creation of a time line to the 8<sup>th</sup> the time lines then transfers to different dimensions and material worlds as a result. The divine world has no concept of time or space and is not bounded by natural physics laws. In essence the Divine world is greater than Infinity and this basically supports the fact that God told his prophets 1 day is much like 1,000 years to explain the concept of time and space. When God created the heavens and Earth, the Earth was void did not exist it was without form. God created the Earth and heavens. This statement would indicate that divinity is greater than infinity because 7 days to create the Earth means 7 events on one time line as discussed in different dimensions. The concept that divinity > infinity would then have to be true.

Thank you for reading this work and its complexity in nature. I hope in the future I may write a website that covers the Barry Infinity Equality Field Equation and its development.
