

**Barry Infinity Equality Field Equation and M string Theory 9<sup>th</sup> Dimension**

**By**

**Barry L. Crouse**

## **Introduction**

I would like to begin by welcoming each and everyone of you for reading this complex work. This work will discuss theoretical and observations based on M string theory and the 9<sup>th</sup> dimension also presenting a new math equation using multiple events into one variable.

The discussion will use M string theory and the 9<sup>th</sup> dimension unifying the Barry Infinity Equality Equation. This will probably be my last work dealing with this topic because according to the M string theory the 10<sup>th</sup> means you have come to a understanding of God which as humans it is not possible within this realm because we live in a material world thus are understanding is not up to par with God's and or we are limited. Please remember that M string theory states each Universe may have different laws of physics and not bounded to each other within the 9<sup>th</sup> dimension hint Independent entity's.

I will present a divinity symbol that represent a menorah 9 candles. and make a observation in the next chapter and than proceed to the Theoretical Equation.

## **Table of Contents**

- 1). Defining the parameters**
- 2). Ninth dimension Equation**
- 3). Final Thoughts**

**Defining the parameters**

**Chapter 1**

I have completed some research and found that during Hanukkah season nine candles sticks are present with one lighted each day to celebrate the holiday. One is used to light the other 8 making a total of nine. If you notice, The middle candle is the one that lights the other eight providing light to all. If you are a little more aware, The middle candle Divinity lights the External and Internal worlds in Korean chunggi Heaven and earth represent eight 1 -4 External and 5 – 8 Internal. Jesus lights the world . We can also look at this in another context meaning we have a dual gateways External and Internal Gateway's. The book of Ezekiel talks about Gates east, west, south, and north. This is written in the bible also is the much discussion about Jerusalem four main gates External on Earth. As far as symbols and observations, it needs to be examined by people who have a little more detail knowledge of this than me but it needs to be brought to light (smile). Please remember it is a theoretical discussion that requires deeper thought and reasoning skills.

I will represent the Jewish menorah with a variable below for the purpose of creating a divine equation that can link to the Internal and External worlds. Please remember that according to M string theory God is above the 9<sup>th</sup> dimension. Please see below.

**Divinity representation  $\Psi = 9$  (M String Theory Equation)**

**Divinity = Divinity representation  $\Psi > 9$**

The parameters and variables are below:

$\Delta E1$  (1-4) This represents the external gateway one thru four the

**Operands { +, -, \*, / }** The external gateways operands allow for expansion, and Contraction E1 represents a subset of E

$\Delta E2$  (5-8) This represents the Internal gateways five thru eight the

**Operands { +, -, \*, / }** The external gateways operands allow for expansion, E2 represents a subset of E . One additional note before creating a equation M string theory states on the 6<sup>th</sup> and 7<sup>th</sup> dimension it has parallel and multi universes.

In conclusion to create the Events from the ninth we have E1 and E2 subsets of E (Time line). In the next chapter, I will present the equation.

## **Ninth dimension equation**

### **Chapter 2**

I will begin by presenting the Equation with explanations, logic, and reasoning skills.

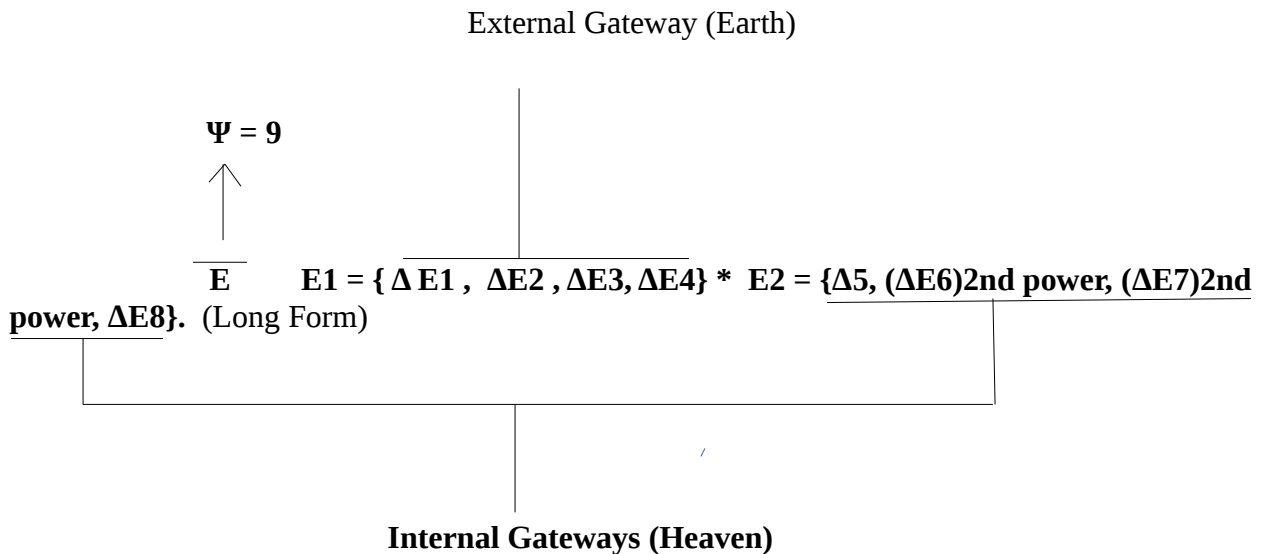

$$\begin{array}{c} \Psi > E \\ \uparrow \\ \hline E \end{array} \quad \mathbf{E1 = \{ \Delta E1, \Delta E2, \Delta E3, \Delta E4 \}} \quad \mathbf{Divinity Representation and M String Theory}$$

The  $\Delta$  represents Expansion and or contraction within each dimension one thru four using the E1 variable

$$\mathbf{E2 = \{ \Delta 5, (\Delta E6)^{2nd \text{ power}}, (\Delta E7)^{2nd \text{ power}}, \Delta E8 \}}$$

The  $\Delta$  represents expansion within each Internal dimension because time lines are created in higher dimensions to be transferred to lower dimensions and E6 and E7 use the 2<sup>nd</sup> power to represent parallel and multi Universes as prescribed in M string Theory. E8 is a digital world no physical matter exist in this world so the best way to represent a non physical work is using the  $\Delta$  Change symbol in Greek because time lines begin in the eight pertaining to Physical worlds and allows for Energy transfers following the laws of Thermo Dynamics. In simple terms, Divinity creates time lines for the Physical worlds 1- 8 to use because Divinity has no recognition of space time as evidenced by the account in genesis when Earth was created when it was without form and void.

I can now use E1 External Gateway and E2 Internal Gateway to create E by linking them together. Equation below:

As you can see the Time lines are dependent on the divinity whether External or Internal thus the equation rewritten below:

$$\Psi > E = \Delta\{ E1 * E2\} \text{-short form}$$

┌────────── **Distributive property**

Divinity is greater than E which has a subset of time lines Internal and External E1 and E2.

I wanted to provide a little humour. As I am looking at this equation in long form it truly is a long string theory equation as mentioned in some videos.

## **Chapter 3**

## **Final Thoughts**

This work is not as long as other works I have written because the difficulty and concept in how to represent Divinity as greater than Infinity in a logical way is not easy.

This work demonstrates two gateways Internal and External equal in variable representation but the number representations show change which in effect makes it dynamic and variable in mathematical terms.

The Internal Gateway to the 5<sup>th</sup> through the 8<sup>th</sup> has parallel Universes along with Multi Universes specifically the 6<sup>th</sup> and 7<sup>th</sup> as defined by M string theory. Please note the fifth dimension is represented as a partial binding a bridge between the External and Internal Gateways this is represented as Subatomic particles.

After completing more research on YouTube it is stated Information equals reality but, to put this into more practical application I will have to put this into practice or rather based on my experience. I can remember testing for my 2<sup>nd</sup> degree Black Belt I was tasked to break two boards one on the left and the other on the right side it also had to be broken with two kicks simultaneously. I can remember going into a deep concentration state seeing what I was going to do before the physical action was to be initiated. I saw myself breaking the boards hint information. I then broke the boards first try this was never done at the dojo 1<sup>st</sup> try. This is reality so Information equals reality. The conscious level created one event the reality initiated two events hint two kicks as discussed above. Thus the equation I have completed demonstrates these application and principles. I had hints dropped on me that I should give it a shot so I did.

I would ask those who are going to have anger issues with this work to consider the fact that I wanted to do something else CPU Designs but I took up this challenge and answered it so do not get ugly on the Internet as it is some peoples custom to do so every time I do something like this.

This concludes my presentation regarding 9<sup>th</sup> dimension and M string Theory. Thank you for viewing this work If you wish to view more works please go to the website below:

The Final equation for Unifying The Barry Infinity Equality Field Equation and M String Theory 9<sup>th</sup> dimension is below in summary short form:

**Distributive property**

$$\Psi > E = \Delta \{ E1 * E2 \} \text{-short form}$$

Divinity is greater than E which has a subset of time lines Internal and External E1 and E2.
